

Find Company Information Fast When Needed. Put techniques, best practices, reports, research findings, white-papers, policy and procedures, drawings, templates, sales & marketing material and other valuable content within a central repository as searchable information profiles.

“Store, Protect, Share, Explore, Relate, Identify, and Find Information”

System Benefits

Share and Reuse Ideas, Techniques and Best Practices.

Provides a repository to document best practices, solutions to common problems, production patterns, refine and promote procedures, techniques and learn from lessons within your community.

Helps Limit Scattered Information.

Avoid storing valuable pieces of information in scattered notepad files, word documents, pieces of paper and other scratch materials.

Encourages Building a Scalable Knowledge Community.

Stimulates creating a community of knowledge sharing within your team, department or company by exchanging valuable experiences between the members.

Preserve and Archive All Organizational Assets.

Track all the organization's information assets. Whether certificates, training courses, policies, contracts, reference material, books, templates, employee CVs, purchased software and hardware, inventories, etc.

Different Paths to the Same Information.

Browse content by profile hierarchy, by latest content posts, by related documents or by a powerful search facility. Share thoughts through a discussion area. Identify information items using unique identifiers.

Completely Web-Based.

Rich content editing using one of the most sophisticated WYSIWYG editors. The application is accessed through a web-browser and utilizes AJAX for near-desktop performance.

A Simple Structure Means A Simple Learning Curve.

Does not require the creation of complex name users, group privileges, business rules. LessonsLearnedServer is simple. It provides complete access to public information, restricts access to private content. That's it!

Features

Rich Editing With Support To Almost All Media Types.

Layout content using a powerful editor, copy content from Word documents, text files or websites, embed different media types within content.

Fast Response Times.

LessonsLearnedServer enables fast response times by forwarding heavy loaded tasks to the LLS.QueueProcessor - a background service that handles heavy tasks asynchronously.

Easy To Use And Deploy.

LessonsLearnedServer provides a neat installer and un-installer that provides easy and clean installation and removal from any server machine.

Scales Like No Other.

What distinguishes LessonsLearnedServer the most is its ability to scale to millions of articles without any degrade in system performance or search response times. This is a result of the amazing queuing architecture it uses to handle heavy background tasks.

Customizable.

Web Application source code is fully available which enables a high level of customization.

Built On Top Of a Rigid Application Platform.

Utilizes technologies that have proven worldwide acceptance and stability. Including Java, Apache 2.2 Webserver, Lucene 2.0, MySQL5 and PHP5. The best combination to serve one of the best information tools you'll ever use.
